SUMMARY

Final-year Software Engineering undergraduate at Cardiff Metropolitan University with strong interest in Software Quality Assurance. Hands-on experience in manual testing, test case design, and test automation using JUnit. Familiar with SDLC, Agile workflows, SQL, Git/GitHub, and API testing with Postman. Detail-oriented, analytical, and eager to learn QA best practices while contributing to real software projects.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Java, SQL
Testing: Junit, Manual Testing, Unit Testing, Test Case Design, Test Automation
Frameworks: React.js, Node.js, Express.js, Java
Tools: GitHub, Postman, MySQL, Figma
CS Fundamentals: Data Structures, Algorithms, OOPs, DBMS, SDLC, Agile

PROFESSIONAL SKILLS

- Problem - solving
- Analytical Thinking
- UI/UX Evaluation
- Test Documentation
- Bug Reporting
- Team Collaboration
- Time Management

EDUCATION

BSc. (Hons) in Software Engineering
Cardiff Metropolitan University
05/2024 - 05/2027

Diploma in ICT
International College of Business & Technology
06/2023 - 12/2023

LANGUAGES

- English — Professional
- Sinhala — Native

WORK EXPERIENCE

Web Designer & Developer — HomeTech Services

Dec 2024 – Mar 2025

- Designed and developed a full-stack company website to showcase services and support customer engagement.
- Built backend functionality for handling customer inquiries through custom contact forms.
- Structured user-friendly navigation and responsive layouts to improve accessibility across devices.
- Delivered a fully responsive website optimized for mobile, tablet, and desktop use.

PROJECTS

Dental Clinic Patient Management System (QA + Full-Stack Project)

- Developed a full-stack web application to manage patient records, appointments, and billing for a dental clinic.
- **Frontend:** HTML, CSS, JavaScript | **Backend:** Java | **Database:** MySQL
- Designed and executed manual test cases for patient registration, appointment booking, and data validation modules.
- Implemented Unit Testing using JUnit for backend services to ensure logic and data integrity.
- Created Test Plan and Test Case documents covering functional, UI, and database testing scenarios.
- Used Git/GitHub for version control and tracked bugs during development.

Library Management System (Full-Stack Web Application)

- Built a full-stack application using React, Node.js, Express.js, and MySQL to manage books, users, and borrowing records.
- Optimized book search with indexed MySQL queries, reducing search time from 800ms to 120ms.
- Developed RESTful APIs and integrated frontend with backend services.
- Implemented core CRUD functionalities for efficient data management.

Ticket Booking Platform (Full-Stack Web Application)

- Developed a full-stack booking system with admin and customer dashboards using React.js, Node.js, Express.js, and MySQL.
- Implemented authentication, booking workflows, and dynamic data handling.
- Used JWT for authentication and bcrypt for password hashing.

HomeTech Services Company Website

- Designed and deployed a business website using WordPress with themes and plugins.
- Built responsive layouts to improve customer accessibility and engagement.
